INTRODUCTION

MindfulMuslim is a mobile app designed to help Muslims maintain consistent salah practices, focusing on the IIUM student community. Salah, a fundamental pillar of Islam, can be challenging to perform regularly due to busy schedules and other distractions. The app features prayer logging, missed prayer reminders, friend tracking, and weekly/monthly analytics.

OBJECTIVES

- Improve prayer consistency among IIUM students
- Promote community engagement and mutual support in maintaining consistent prayer habits.
- Support IIUM students in fulfilling their religious obligations through practical and convenient tools.

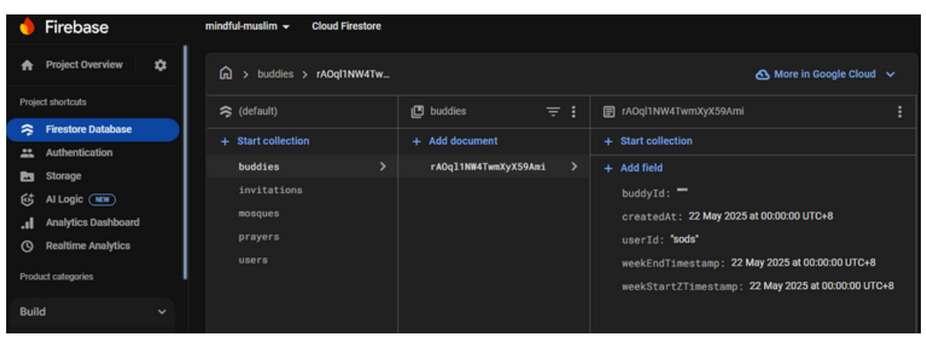
SYSTEM COMPARISON

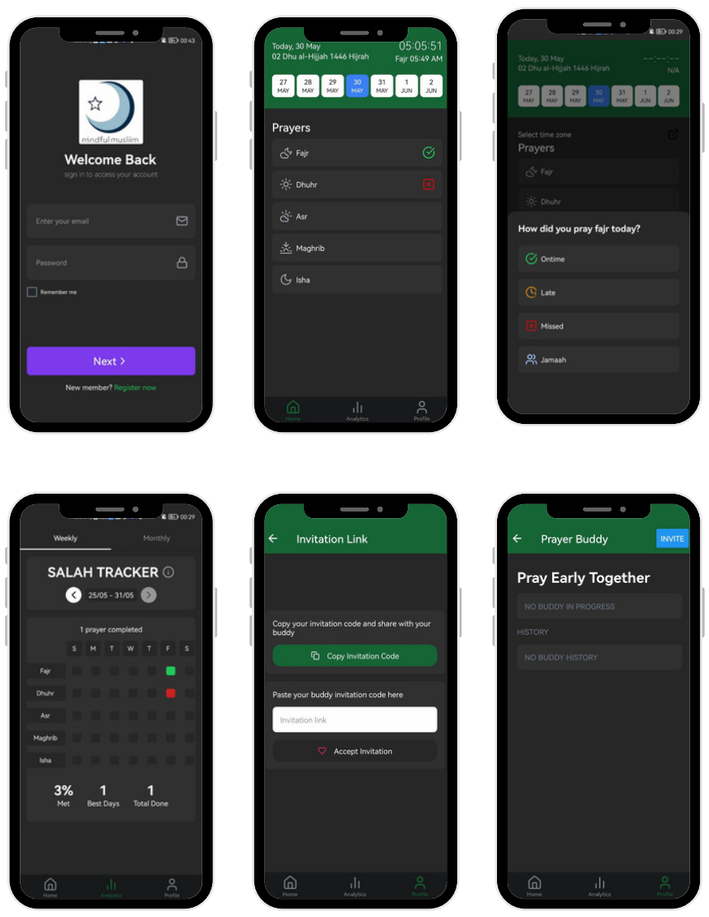
App	Weekly /Monthly Records	Challenge	Prayer Hadith	Reminder
Mindful Muslim	✓	✓	✓	✓
Daily Deeds	✓	✗	✗	✓
Everyday Muslim	✗	✓	✗	✗
eEbadat	✗	✗	✗	✓
Hudi	✗	✗	✓	✓

RESULT



MindfulMuslim achieved its goals with a unique daily prayer tracking system, setting it apart from other Islamic habit apps. The Android app, integrated with Firebase, is fully functional and meets all user requirements and main functions. Future enhancements include wearable integration, motivational features, and calendar syncing.

USER INTERFACE



CONCLUSION

MindfulMuslim supports daily prayer and spiritual growth through personalized habit tracking and Jamaah participation at registered venues. While currently limited to Android devices and reliant on the costly Google Maps API, these challenges pave the way for meaningful improvements. With ongoing enhancements, MindfulMuslim is positioned to become a comprehensive and accessible spiritual companion for Muslims worldwide.
